

Guelph Programming Competition

Group name: _____

Total: _____

Grade	Max Point	Requirement
15 Pts	Performance: automatically measured on fixed dataset	
	5 pts	Deliverable is well documented, easy-to-use and therefore test
	10 pts	Produces correct output on test set: This is based on the point you received during the testing. ¹
Comments		
15 Pts	Meets the needs of the user:	
	5 pts	User interface
	5 pts	Does the system enforce fairness/reliability or robustness to cheating?
	5 pts	Does the system meet the needs of the user?
Comments		
20 Pts	Presentation	
	5 pts	Oral presentation
	5 pts	Written report is organized, including appropriate sectioning, figure placement, titles and captions
	10 pts	Quality of the written material
Comments		

1. The points are given based on number of people and their seniority points. There are some negative points for unscheduled time slots. For more information check the handout. The overall mark for this section is going to be scaled down to 10.

25 Pts	Description of system architecture	
	10 pts	Main Algorithm, why did you choose it?
	5 pts	Accurate representation of the design of the system?
	10 pts	Identifying both strengths and weaknesses?
Comments		
10 Pts	Description of your choice of process, techniques and tools	
	5 pts	Did you clearly describe the criteria you used for your decision?
	5 pts	Is the choice sensible, given the criteria?
Comments		
15 Pts	Your implementation plan	
	5 pts	Did you clearly state the rationale you used for this selection?
	5 pts	Did your plan take into account the user's likely priorities, as well as the time and effort available?
	5 pts	Did you identify the major risks associated with your plan?
